

## Does Your HR System Offer:

- ▶ Tools to improve manager responsiveness?
- ▶ Increased HR service delivery processes?
- ▶ Easy to deploy mobile self-service capabilities?
- ▶ Access from anywhere while on the go?

## Mobile Connect

Today's workforce is on the move so you need tools that will help keep up with managers and employees. The Epicor HCM Mobile Connect allows both Managers and Employees access to frequently used self-service tasks from their mobile device.

### For the manager

Good managers know how important it is to be responsive to their direct reports. Now, they can respond even faster from their iPad, iPhone or Android devices. Whether they need to verify an employee's time off balance, approve requests for time off, find employee data and emergency contact information or initiate employee changes, it's all at their fingertips.

### For the employee

Employees want information readily available. HR wants to empower them to keep their information up to date. Extend your self-service reach by allowing employees direct access to update their personal data such as address and contact information, view their insurance information, even search the company directory. And now, they can view their time off balances and submit a request for time off when it's convenient for them. Need a reminder? With the mobile To-Do List, employees can add, edit or complete list items, so they won't forget those important things that need to get done.

All these features are enabled with "click to call" so keeping in touch while on the go is easy. You simply deploy a portal and log in through the device's browser. HR doesn't have to support various versions of device applications. No application install is required. Use the Configure Mobile Utility task to personalize your mobile portal, including adding your company image and customizing the menu layout. You can also use this task to control employee access to the mobile portal.

So, whether you provide mobile devices or support a bring-your-own-device policy, your managers and employees can complete tasks, view information and access data conveniently.

## About Epicor

Epicor Software Corporation drives business growth. We provide flexible, industry-specific software that is designed around the needs of our manufacturing, distribution, retail, and service industry customers. More than 40 years of experience with our customers' unique business processes and operational requirements is built into every solution—in the cloud, hosted, or on premises. With a deep understanding of your industry, Epicor solutions spur growth while managing complexity. The result is powerful solutions that free your resources so you can grow your business.
