MANAGED SERVICES

Remote Workforce Augmentation

Encompass Managed Services provides remote workforce augmentation, extending a business' ERP staff and support anytime, from anywhere.

Service Details

Whether you're working on the road, at home, or onsite, Encompass has the capacity to supplement your ERP staff remotely.

- > Overburdened with incoming orders or outgoing purchase orders?
- > Need someone to run regular reports?
- > Do you need an extra pair of hands?
- > Do you need to bridge a gap within your office staff?

If you answered yes to any of these, Encompass has the right person for you.

It all starts with an informal review of your current process, which includes:

- > Order Entry,
- > Purchase Order Entry,
- > Customer Statements,
- > and more

You provide Encompass with your procedures and our team will execute this according to your business processes and requirements.

Next, we will document our progress throughout the day, providing regular reports and communications to your team or "next in line" person to make sure you are always kept up to date.

Reach out today to learn more about how remote workforce augmentation can help overcome the obstacles that emerge in the face of staffing constraints and talent shortages.
